

# Comfortex® Xtenda Care™

## Affordable Excellence

### *Basic*

- Replaceable Stratos shear-reducing top cover is Healthcare's most durable and effective barrier against contamination.
- A layer of HR (high resiliency) top foam for enhanced comfort and pressure redistribution.
- A supportive foundation prevents heavier patients from bottoming out.

### *Firm Edging*

- High density, firm edging provides added support for easier patient transfers.
- Firm Edging is bonded to the Core and Top foam for greater strength and durability.

### *Secure Edging*

- Ultra Firm Edging rises above the horizon of the sleep surface to direct patients away from the edge of the bed and an accidental fall.
- Soft Central exit area facilitates supported transfers and sitting at the edge of the bed.
- A more conventional mattress appearance protects patient dignity.

"Great Value for a low price! These mattresses hold up better than most of the other mattresses we've had. The Residents seem very comfortable on the XtendaCare." Dir.of Nursing, AL

**Comfortex Innovating Surfaces**

1680 Wilkie Drive, Winona, MN 55987
