

## Behavioral Healthcare...

...**Closed System**<sup>®</sup> mattresses from **Comfortex**<sup>®</sup>

Recognized by the

**Behavioral Health Facilities Design Guide ( item 492d )**

Tailored to meet the **Comfort** and **Care** needs of your patients,

while meeting or surpassing the Safety Requirements for Behavioral Health excellence.

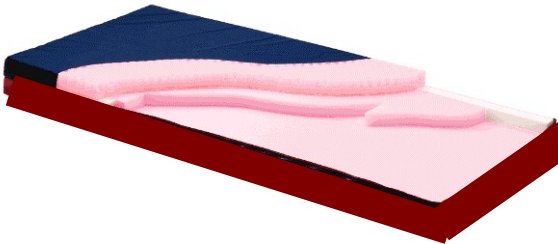

## Unique Needs...Unique Designs:

**Comfort and  
Pressure Reduction**

### **XtendaCare CS**

Soft, highly resilient top layer with a supportive base increases comfort and prevents patients from bottoming-out.

### **Newlife CS**

This rotatable mattress offers high resiliency support, with a softer area beneath the shoulders and heels, for enhanced patient comfort.

**For Advanced Pressure  
Redistribution**

### **Rest-Q CS**

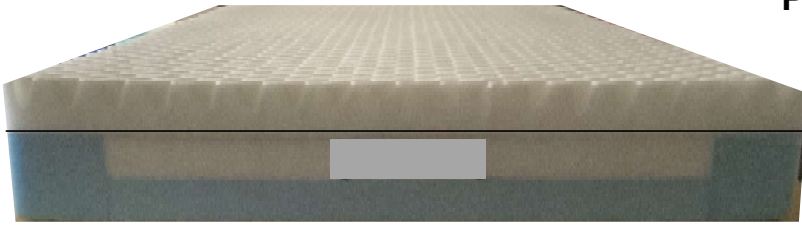

Clinically proven pressure redistribution & shear reduction for higher risk prevention & wound care.

Clinical studies and product comparisons show the Rest-Q surpasses far more costly surfaces for pain management and wound treatment. ( stages 1-4 )

***Patients and Staff...Will All Rest Easy,***

***with Comfortex<sup>®</sup> Healthcare Surfaces.***

## The Protection you Can't see.

Inside the mattress, are layers of High Resiliency support materials to ensure greater **Comfort, Pressure Redistribution and Product Life.**

Ultra Supportive Material along the sides of the mattress provide safer, more stable, edge-of-the-bed seating.

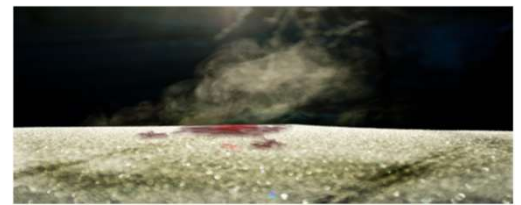

Heat Sealing can weaken a fabric and in turn, the covers seams.

The Comfortex Closed System design uses an **Inverted, Double Stitched process** for greater strength, durability and protection.

Water-Resistant is Not good enough. The Moisture Vapor and Viral Barrier Protection engineered into Comfortex's fabrics is unmatched.

**Patients won't get into the Comfortex mattress...  
...Neither will microscopic contaminants**

**A German Institute of Health pain study** compared the Comfortex Rest-Q mattress and the Tempur® Memory Foam mattress with patients suffering chronic pain.

Patient Comfort			
Comfortex Rest-Q	20	15	6
Tempur Memory Foam	2	25	14
	Much Improved	Improved	No Change

**Which Also Meant:**

**Call Lights** requesting assistance with positioning or other comfort measures were reduced by 43% when on the Rest-Q® and 18% on the Tempur mattress.

**Pain Medications** were requested 24% less when on Rest-Q's, but no reduction when on the Tempur.

**Comfortex® Behavioral Health Mattresses & Cushions compliment the care you provide better and longer than all others.**
